### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Morano on 12/2/2009.

The application has been amended as follows:

2. Please amendment claim 29 to be the following:

29. The method of claim 28, further comprising:

after applying, in the frame period next to said one frame period, the normal data signals to the pixels in the first scanning area,

applying gate-on voltages to gate lines of the third scanning area after the last gate-on voltage is applied to the last gate line of the first scanning area and applying the black data signal to the pixels connected to the gate lines of the third scanning area in the frame period next to said one frame period.

3. The following is an examiner's statement of reasons for allowance:

Claims 3-5, 7, and, 20-33 are allowed.

The present invention is directed to a method of driving a liquid crystal display device and display device. Claims 20 and 29 identifies the uniquely distinct features of driving gate lines in scanning areas in a first arranging direction to supply normal image data to pixels during a first frame and then driving the gate lines in the scanning areas in a direction opposite the arranging direction to supply normal image data to pixels during a second frame immediately following the first frame. The closest prior art, Matsumura et al. (USPqPub: 2002/0044117) and Surguy (USPN: 5233338) disclose a method of scanning groups of pixels of a display device in a first arranging direction in all frames and a method of alternating the scanning direction of all gate lines in a signal frame, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven E. Holton whose telephone number is (571)272-7903. The examiner can normally be reached on M-F 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin Shalwala can be reached on (571) 272-7681. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
